6.9 **No Tampering or Modification.** You must not change, tamper or modify any part of our System or the Security Mechanism without our prior written consent and you are responsible for all costs or expenses incurred by us in rectifying the System and/or the Security Mechanism because of such unauthorised change, tampering or modification.

6.10 **Limitations.** Any Security Mechanism is provided "as is" and no warranty is given on the Security Mechanism, including without limitation its reliability, functionality or availability. To the maximum extent permitted under applicable law, all representations, warranties, conditions and other terms implied by statute, common law or otherwise in respect of the Security Mechanism are excluded from these EB Services Terms and Conditions (including, without limitation, the implied conditions, warranties or terms as to satisfactory quality, fitness for purpose or the use of reasonable skill and care).

The following are given as illustrations of the types of risks which you may encounter and does not purport to disclose all of the risks or other relevant considerations of entering into foreign exchange, treasury and derivative transactions.

- (a) **Market Risk.** There is a general risk of market failure which arises from political or financial or macro-economic developments. In particular, changes in exchange rate(s) can be unpredictable, sudden and large and may be affected by complex and interrelated global and regional political, economic, financial and other factors that (directly or indirectly) can affect the currency markets on which the relevant currency(ies) is traded.
- (b) **Credit Risk.** Any Transaction may subject to the credit risk of the Bank.
- (c) **Legal and Enforcement Risks.** There is a risk that default due to, for example, credit failure, will lead to consequential legal and enforcement problems.
- (d) **Liquidity Risk.** The benefits of customization in achieving particular financial and risk management objectives may be offset by significant liquidity risks.
- (e) **Operational Risk.** It is essential to ensure that proper internal systems and controls are sufficient to monitor the various types of risks which can arise and which can be quite complex.
- (f) **Emerging Markets.** Transactions involving emerging markets involve higher risk as the markets are highly unpredictable and there may be inadequate regulations and safeguards available to participants in such markets.

In addition, Transactions involving certain currencies may involve specific risk factors only relevant to such currencies and we may provide you with additional risk disclosure statements from time to time. You are deemed to have acknowledged the receipt of such risk disclosure statements and the relevant risks involved should you proceed to execute a Transaction with us.

**9. ADDITIONAL TERMS AND CONDITIONS FOR SINGLE CONTROL MECHANISM**

- 9.1 **Risk disclosure statement.** You understand that IDEAL™ uses double control mechanism as default setting, which prevents transactions from being created and approved by the same individual and committing fraud. Double control mechanism requires at least two people to complete transactions, with a person creating transactions and another person with supreme authority approving the transactions. Double control mechanism decentralizes authorities and thus reduces the risk of fraud. Transactions can be completed by an individual through single control mechanism; therefore, single control mechanism is more risky than double control mechanism.

You authorize DBS Bank to set up single control mechanism for your IDEAL. You commit that any loss, expense (including full cost of attorney's fees), cost, compensation, recourse, request, lawsuit and any other responsibility suffered from DBS Bank derived from the setup of single control mechanism will be fully compensated by you. You understand and agree that DBS Bank can notify you of terminating or changing the single control mechanism at any time.
